

OUTLANDER
PHEV

A photograph of a modern building's exterior. On the left, a wooden slat fence runs vertically. To its right is a white wall with a black rectangular light fixture. Further right is an open garage door, revealing a white interior wall. On this interior wall, a black charging cable is coiled and hangs from a small metal hook. The cable's plug is inserted into a standard wall outlet. The floor of the garage is dark asphalt. The scene is brightly lit, suggesting daytime.

Change is good.

CHANGE IS HEALTHY – FOR YOU AND THE EARTH.
Outlander PHEV WILL CHANGE YOUR LIFE.

FOR THE BETTER.

YOU'LL RETHINK YOUR APPROACH TO ENERGY.
YOU'LL PLAY A PART IN SHAPING THE FUTURE
AND FEEL GOOD DOING IT.

BUT SOME THINGS WON'T CHANGE,
LIKE THE PRACTICALITY YOU WANT FROM AN SUV.
IN FACT, THE ONLY THINGS YOU'LL
SAY GOODBYE TO ARE HIGH EMISSIONS
AND A LONG STRING OF PETROL STATIONS.

Just go

EASY TO CHARGE, EFFORTLESS TO DRIVE, A PLEASURE TO LIVE WITH.

Charging your devices is something you don't really think about. It's the same with **Outlander PHEV**. Plug it in at home in a standard 10-amp socket while you sleep. This means you'll make the most of off-peak rates, which will be around \$1.41*. You can set charge times easily from the smartphone app. A full battery will get you 54km (based on the ADR 81/02 test procedure) with no emissions and practically no noise, enhanced even further by soundproofing throughout the vehicle.

When you're going downhill, regenerative braking puts power back into the battery. If you're out and about, the ever-growing national network of fast-charge stations can fill the battery to 80% capacity in just 20 minutes.

The impressive acceleration comes from the twin electric motors. An efficient 2.0L petrol engine helps to charge the battery as you drive, or provide additional torque when required. The vehicle chooses the best drive mode automatically, letting you enjoy the journey and the exceptional fuel economy – as low as 1.7L per 100km. At that rate, a full tank of fuel could easily last a month and let you sail past the petrol stations.

» MODEL SHOWN Outlander PHEV VRX.

» IT'S EASY

While its design is advanced, **Outlander PHEV** is very simple to use. And you won't sacrifice a micron of practicality, comfort or range.

» STATE-OF-THE-ART SAFETY

The latest safety features keep you and your family very well protected. Every model offers Forward Collision Mitigation, Adaptive Cruise Control and a 5-star safety rating.

» THE NEXT LEVEL OF EFFICIENCY

Never before has a family SUV offered fuel efficiency like **Outlander PHEV**. The only thing that beats it is the Electric Vehicle Drive Mode setting.

» EQUIPPED FOR LIFE

From clever connectivity to luxury, to the features that make family life easier, **Outlander PHEV** is thoroughly appointed.

Use your energy wisely

» MODEL SHOWN Outlander PHEV VRX.

ONCE YOU DRIVE **OUTLANDER PHEV**, YOU'LL SEE OPPORTUNITIES TO CONSERVE ENERGY ALL AROUND YOU.

Because **Outlander PHEV** is also an electric vehicle, you can drive in purely electric mode. On a full charge, your daily commute could be completed without using any petrol at all. Every hill and red light you encounter as you drive is a chance to generate energy. Use the paddle shift to increase the regenerative braking resistance and you're putting power back into the battery.

You can keep the charge in the battery using the Battery Save setting. Use the petrol

engine to fill the battery directly with Battery Charge mode, which gives you an 80% full charge in about 40 minutes. To increase the efficiency of the vehicle's operation, select Eco Mode.

Everything you need to know about the use and reclamation of energy is displayed on the large touch screen. It's a new dimension of driving that you, and the Earth, will enjoy more.

» **EV BUTTON**
Switch to EV Priority Mode, and zero emissions, instantly.

» **ENERGY FLOW**
Whichever drive mode you're in, you'll see how the battery, electric motors and petrol engine are working together.

As safe as it is smart

WHERE SAFETY IS CONCERNED, **OUTLANDER PHEV** MAKES NO COMPROMISES.

All the traction systems you'd expect are on board, such as Active Stability Control and Active Traction Control. There are ABS brakes on every wheel, controlled by Electronic Brakeforce Distribution.

Because EV Priority Mode is so quiet, all models use a sonic warning system to alert pedestrians of your presence in busy areas. Advanced safety features are standard across the range, such as Forward Collision Mitigation, which reacts quickly to sudden deceleration by the vehicle in front and greatly reduces the chance, or the damage, of a collision. Adaptive

Cruise Control matches your speed to the vehicle in front. In car parks, the Misacceleration Mitigation System on **VRX** detects obstacles and cuts engine power if you're heading towards them without slowing down. **VRX** also alerts you to vehicles you might not have seen beside, you with Blind Spot Warning.

Inside, you're kept safe by 7 airbags and a rigid body design that absorbs energy. Even the battery is enclosed in a strong casing that's withstood conditions you're never likely to encounter. The 5-star safety standard is easily achieved by all models.

» ALWAYS WATCHING

Sonic warning for pedestrians and a suite of advanced sensors constantly monitor your conditions.

All the latest features

IN ADDITION TO ITS ADVANCED MOTOR SYSTEMS, **OUTLANDER PHEV** IS EQUIPPED WITH MANY CLEVER FEATURES TO ENHANCE YOUR DRIVE, YOUR COMFORT AND YOUR ENTERTAINMENT.

Outlander PHEV integrates with your all-important mobile phone. The Smartphone Link Display Audio System connects to iPhone and Android to send and check messages, operate maps, play music and more – all through voice command.

All this happens on the large 7" touch screen, which is where a wealth of vehicle information is displayed. The smartphone app lets you choose the best time to charge and activate the climate control remotely, so the vehicle is the perfect temperature when you get in.

Because it's a family vehicle, it's very

accommodating. All passengers are seated comfortably, however long the drive. The front passengers enjoy heated leather seats, in **VRX**. The rear seats fold down for a lengthy 1,845mm of cargo-carrying space.

When an adventure beckons, you have very capable twin-motor 4WD and Super All Wheel Control at your command.

The 5 year/ 100,000km warranty covers your vehicle in any situation you might encounter.

Your battery is well protected, too. It's reassuring to know that this vital component is covered by an 8 year/160,000km warranty.

- » (RIGHT) FAST CHARGE IN AS LITTLE AS 20 MINUTES
Get an 80% charge in as little as 20 minutes at any fast-charge station.
- » (BELOW) BETTER VISIBILITY

A BETTER KIND OF WARRANTY

The other important feature of Outlander PHEV is its reliability. The technology might be new, but it's designed to perform consistently. Should you need it, however, the warranty will provide total peace of mind.

Our Plug-In Hybrid Electric Vehicle Warranty comprises a 5 year/ 100,000km comprehensive Manufacturer's Warranty, which covers your Outlander PHEV. 5 years Premium Roadside Assist looks after you if the unexpected happens.

The battery is covered by an 8 year/160,000km warranty, which is very reassuring protection for one of the vehicle's main components.
